

Ideation Phase

Define the Problem Statement

Date: 03 March 2026
Project Name: AI/ML Based Quotes Recommendation System

Customer Problem Statements

- I am a student trying to stay motivated during academic challenges, but I struggle to find relevant and meaningful quotes because most platforms provide generic content, which makes me feel unsupported.
- I am a working professional trying to manage stress and deadlines, but I cannot find emotionally personalized quotes, which makes me feel overwhelmed.
- I am a content creator trying to share impactful quotes, but searching through unorganized sources takes too much time, which makes me feel inefficient.

Problem Summary:

There is a need for an AI-powered system that understands user emotions, preferences, and context to deliver personalized, relevant, and meaningful quotes in real time.

Problem Context Diagram

User Emotional State
Searches Generic Platforms
Receives Random / Irrelevant Quotes
Feels Unsupported / Dissatisfied
